About

Results-driven Full-Stack Web Developer with experience in front-end technologies like React and Bootstrap, and back-end skills using Node.js and Express. Excelling in turning innovative ideas into user-centric digital solutions. With a strong problem-solving mindset looking for new challenges in various industries. Let's connect to discuss how we can collaborate on transforming ideas into impactful web applications.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap

Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars

Projects

Hero Tracker | [Hero-Tracker](#)

Designed the backend functionality of the app

- The application was to be used in a hypothetical adventure game where players could track their characters' inventory and different abilities.
- Tasked with designing the backend functionality of this application I used Mysql to store in-game data. Using routes and models I made it possible to add, delete and update different characters' categories.
- Javascript, Bulma, Bootstrap, Mysql2, HTML, CSS, Heroku

Superhero Search | [Superhero-Search-SA](#)

Designed frontend of application

- Using an API from Marvel Studios, users can search for different superheroes and save a list of their favorites.
- Using HTML, CSS and Bulma I designed the Home, Search and Favorites pages to create an engaging user experience.
- HTML, CSS, Bulma
